

EVV IS COMING

What Minnesota Agencies Need to Know About Electronic Visit Verification (EVV)

THE REQUIRED DATA

The 21st Century Cures Act requires the following data be electronically verified and submitted with every claim:

- ✓ Type of service
- ✓ Individual receiving service
- ✓ Date of service
- ✓ Location
- ✓ Individual providing service
- ✓ Start and end time of service

THE TRUTH

EVV is an opportunity to implement a comprehensive, end-to-end agency management platform designed to streamline your operations and track and improve quality of care.

THE HYBRID MODEL

Minnesota will employ a hybrid model, which allows providers to use their own system that meets the state standards, or use the state provided system. If a provider uses their own system, they will be given an option to upload EVV data to the state.

THE OPPORTUNITY

Implemented EVV has added benefits for your agency including real time service monitoring, higher DOL compliance and streamlined time and attendance that automatically feeds payroll and billing. We have customers who are already using our EVV solution to improve efficiency, eliminate errors, and simplify their billing, payroll and documentation process. These customers are reporting efficiency gains of 60-80% over their manual day-to-day operations.

SCHEDULE A DEMO

We'd love the opportunity to walk you through the unique tools and features that Cashé customers use to streamline their operations, improve compliance and quality.

ABOUT CASHE SOFTWARE

Cashé is based in Minnesota with 14 years of experience and more than 300 customers. We're known for our close partnerships with our customers and our passion for making a difference in the lives of people in need.
